

FRIENDS OF TURN MOSS OVER THE MOON WITH £375K Trafford Council INVESTMENT

Friends of Turn Moss are absolutely over the moon to hear the news of Trafford Council's decision to invest in Turn Moss. The site has been sadly neglected for over a decade. Local teams' pleas for investment have fallen on deaf ears, the changing rooms are in a sorry state and with no pitch maintenance the poor drainage means games are often cancelled.

We have always believed Turn Moss can be improved without having to make sacrifices. Thank you Andrew Western for listening and agreeing with us that Turn Moss deserves better. This is a giant step forwards and a clear signal of intent.

£375K for new changing rooms and pitch improvements will mean more local people can enjoy the fields, be healthy and have fun. It will benefit the local teams and it will allow the Friends of Turn Moss to run more events for the wider community, we believe this wonderful greenbelt site can be so much more than it is at present.

The benefits of having a responsive Labour-led Trafford Council cannot be overstated. They have been a pleasure to work with from the moment they gained power in May. We have met many times with our Councillor Anne Duffield, she has listened patiently to our requests and worked very hard to ensure the right people understand why a positive change was needed now.

The love local people have for the fields is well documented, we are excited and delighted we can now work with our local teams, councillors, Trafford Council and Trafford Leisure to bring improvements that benefit all. Happy and healthy local communities and solid investment in green spaces, go hand in hand. Thanks to all those who joined us to save Turn Moss last year, together we made a difference and ensured the "powers that be" had to listen.
